

Promotion of Afforestation Through Use of "ENEOS Cards"

– Use of ENEOS service stations increases valuable forests! –

Nippon Oil Corporation (President: Shinji Nishio) announces that as one of the perks of the personal credit card, "ENEOS Card", we shall contribute at our cost, 0.01% of the amount used at ENEOS service stations (hereinafter "SS") by our member customers to *National Land Afforestation Promotion Organization and that on May 31, we presented approximately ¥12.4 million to the organization for the second half of 2007.

This support initiative started in October 2001 when the card was introduced, and customers who use SS evaluate the support favorably stating, "we are unknowingly participating in afforestation promotion activities."

The accumulated total donation has reached ¥115.3 million and this money has been used to fund various environmental assistance activities conducted by the organization such as reforestation work, tree-planting activities by youths, regeneration of tropical forests and desertification prevention activities.

Under our group philosophy of "creating the energy future and promoting prosperity and harmony with nature", we shall actively undertake environmental contribution activities.

* A corporation established in 1950 as a parent body for fostering and promoting the land afforestation campaign as a national movement, and is a fund-raising body for the "Green Fund" campaign.
